

## ❖ HOW TO ENABLE GUJARATI FONTS IN OPERA MINI BROWSER

- Now press ' # ' button and then ' 1 ' to active the address bar. Type about:config

OR

- config:  
on ' address bar '. Press ' OK ' ( middle soft key to go this address. )
- A page will be loaded named 'Power – User settings'.  
Go to bottom of the page by pressing & holding the button ' 8 '.
- You will find an option named ' Use bitmap fonts for complex scripts '. Change the parameter to ' Yes ' from ' No ' & click on ' Save ' button.
